DJLBS AND FORGING PLANTS 1911.

BY
SPECIAL APPOINTMENT TO

HIS MAJESTY
THE KING

JAMES VEITCH & SONS LTD

CHELSEA

VEITCH'S BULBS FOR 1911

QUALITY AND PRICE.

While still maintaining the high quality of our Bulbs, we have carefully revised the prices for the present season, with a view to encourage extensive planting. Narcissus and Tulips have especially been considered in this respect, and the prices of these bulbs are materially reduced, so that even the choicer varieties may be used in beds, borders, shrubberies, or other places where masses of bulbs can be planted with good effect.

SELECTION.

The almost innumerable varieties of Hyacinths, Tulips, Daffodils, etc., now in cultivation, render the task of selection somewhat difficult, but by means of continuous trials in our own grounds, coupled with careful personal inspection of the best Bulb-farms in Holland, we are able to offer only those likely to give our customers satisfaction.

BULBS IN GRASS.

The beautiful effects obtainable by planting Daffodils, Crocus, etc., in grass are yearly becoming more appreciated, and our liberal offers at low prices (see page 1) are specially designed to encourage this tendency.

FORCING.

The popularity of Early White Roman Hyacinths and other Bulbs for early forcing shows no signs of diminution. Page 3 is specially devoted to this section. We may perhaps be permitted to remind growers that the Bulbs **must be well rooted** before they are placed in heat. Lack of attention to this very important detail is frequently the cause of failure, which is unjustly attributed to some imaginary defect in the bulb.

JAMES VEITCH & SONS,
CHELSEA.
Ltd.,

SPECIAL LOW OFFER OF BULBS

FOR PLANTING IN MASSES.

Hardy, free flowering, and adapted to thrive in almost any soil or situation. Many will increase in effect every year if not disturbed.

50 supplied at the price per 100, and 500 at the price per 1,000. Special prices quoted for large quantities.

BULBS FOR WINTER FORCING.

Beautiful Flowers in the Depth of Winter.

EARLY WHITE ROMAN HYACINTHS.

EARLY WHITE ROMAN HYACINTHS.

This beautiful and very valuable variety, if planted early in September and gently forced, will bloom in November, or their flowering may be retarded till Christmas or later by keeping them in a cool place. The flowers, which are smaller than those of the ordinary Hyacinth, are produced in great profusion, each bulb throwing up three or four spikes of delicately-scented clear white blossoms.

	Per 100.	Per doz.
Extra Large Bulbs, very scarce	per 1,000, 185/-	20/- 2/9
First-sized Bulbs	" 150/-	16/- 2/3
Single White Italian Hyacinths, valuable variety to follow the white Roman Hyacinths, also for growing in bowls		15/- 2/3
* Single Blue Roman Hyacinths		10/6 1/6
* Double Rose Italian Hyacinths		12/6 1/9

* These two varieties bloom a fortnight or three weeks later than the Early Roman; but they are not free flowering or effective, and we do recommend them.

Dutch Miniature Hyacinths, excellent for forcing, blooming a fortnight later than the Roman Hyacinths, but producing a larger spike of bloom. See illustration.

	Per 100.	Per doz.		Per 100.	Per doz.
Pure White	10/6	1/6	Light Blue	10/6	1/6
Rose	10/6	1/6	Dark Blue	10/6	1/6
Crimson	10/6	1/6	Yellow	10/6	1/6

NAMED HYACINTHS.

Specially selected varieties, particularly adapted for early forcing, per doz., 6s.

The number of varieties suitable for this purpose is very limited. They are selected with a view to very early flowering only, and the spikes of bloom generally will not be so large or full as those which are usually grown for the main display. A most important point in the cultivation is to have the bulbs well rooted before beginning to force.

NARCISSUS POLYANTHUS. See page 9.

TULIPS SUITABLE FOR FLOWERING AT DIFFERENT SEASONS.

Half the above Collection for 11/-

VEITCH'S COLLECTION C.

Six each of 12 fine Daffodils for 15/-

MADAME PLEMP.

DAFFODILS OR NARCISSI.

The following list contains a selection of the finest and most distinct Daffodils, as also the most beautiful and desirable new hybrids, selected with care from the almost innumerable varieties of these hardy and attractive spring-flowering bulbs, so highly esteemed for their profusion and duration of bloom. Many when grown in pots form charming plants, either for Window, Conservatory, or Drawing Room decoration, and if required in flower early, can be gently forced in the same manner as Hyacinths.

We grow a large collection of all the best and most distinct varieties, and confidently recommend those printed in bold type as being the finest of the various sections. Any not offered in this list can be supplied at the usual prices.

SECTION I.—LARGE TRUMPETS.

Flowers with the crown or trumpet as long or a little longer than the divisions of the perianth.

This most beautiful section includes the true Daffodils, and what are known as Ajax, Grand Trumpets, and all varieties having long trumpet-shaped flowers.

The varieties marked with an asterisk (*) are suitable for pots as well as for the border.

Per 100. Per doz.

Per 100. Per doz.

* **Albicans** (Moschatus of the Dutch), long sulphur trumpet changing to white, with white perianth; fragrant and free flowering. Height 15 in.

1/3

Ard-Righ or Irish King, very large rich yellow trumpet, with deep yellow perianth; one of the earliest of the large varieties; recommended for planting in shady places

10/6 1/6

* **Bulbocodium** (Yellow Hoop Petticoat), a very distinct and free-flowering dwarf species; flowers of rich golden yellow, suitable for edgings and very effective when planted five to seven bulbs in a pot

10/6 1/6

* **citrinus** (Large Sulphur Hoop Petticoat), beautiful pale lemon colour. Height 6 to 8 in.

6/6 1/-

monophyllus (Clusii or White Hoop Petticoat), pure white, very early. Height 6 in.

— 1/9

Chelsea Gem, compact truss of from four to six flowers on each stem; the perianth is pure white, with a creamy white trumpet; a beautiful variety for the rockery.

— 6/6

* **Countess of Annesley**, a fine bold flower of a rich yellow colour, a very desirable early variety; especially recommended for planting in grass

— 1/9

* **Cyclamineus major**, a distinct dwarf species of deep yellow colour, with reflexed perianth

— 2/6

* **Emperor**, of immense size and great substance, trumpet clear golden yellow, with broad primrose-coloured perianth,

per 1,000, 62/6 6/6 1/-

Extra Strong Bulbs,

per 1,000, 80/- 8/6 1/3

Empress, one of the largest and noblest of all Daffodils, rich golden yellow trumpet, with broad white perianth of great substance,

per 1,000, 62/6 6/6 1/-

* **Excelsior**, handsome early-flowering variety, somewhat resembling *Golden Spur* in form, rich deep golden yellow

12/6 1/9

Glory of Leiden, flower of very large dimensions, somewhat resembling *Emperor*, but much larger; yellow trumpet with broad primrose perianth. First Class Certificate, Royal Horticultural Society. See illustration

40/- 5/6

* **Golden Spur**, immense golden trumpet, slightly reflexed at mouth, perianth broad and twisted; early, extra fine, for pots or borders

per 1,000, 70/- 7/6 1/3

Extra Strong Bulbs,

per 1,000, 100/- 10/6 1/6

MIXED TRUMPET DAFFODILS.

DAFFODILS OR NARCISSI.

SECTION J.—LARGE TRUMPETS.

HORSFIELDII.

Per 100. Per doz.

- * **Grandis**, large golden yellow trumpet, with broad white perianth as large as *Horsfieldii* but about fourteen days later in blooming; fine flower of great substance,
per 1,000, 37/6 4/- -/8
- * **Henry Irving**, a bold and striking variety, having a large rich golden wide trumpet, recurved at mouth, and broad clear yellow perianth; excellent for forcing 7/- 1/-
- * **Horsfieldii** (King of Daffodils), a splendid free-flowering early variety, immense golden yellow trumpet, with white perianth; one of the finest per 1,000, 52/6 5/6 -/10
Extra Strong Bulbs ,, 70/- 7/6 1/3
- * **J. B. M. Camm**, perianth white, trumpet cream-coloured; a distinct and very beautiful variety. First Class Certificate, Royal Horticultural Society 12/- 1/9
- * **Johnstoni, Queen of Spain**, distinct species, sulphur-coloured, perianth reflexed; one of the best varieties for planting in grass, recommended also for bowl culture 17/6 2/6
- * **Madame de Graaff**, a magnificent variety, pure white perianth, large expanded trumpet, which opens a soft primrose shade passing to white, beautifully imbricated; strong healthy grower and free bloomer. First Class Certificate, Royal Horticultural Society each, -/6 — 5/6
- * **Madame Plemp**, immense golden yellow trumpet with broad white perianth; a well-formed flower of great substance; a most desirable variety. See illustration page 4 10/6 1/6
- * **Major, Early French Variety**, trumpet and perianth deep golden yellow, very effective; a most desirable free-flowering early variety 10/6 1/6
- * **Maximus**, immense size, one of the finest in this section, trumpet and perianth deep golden yellow, trumpet well opened, recurved and fimbriated at edge, perianth elegantly twisted 8/- 1/3
- Moschatus** (of Haworth), a distinct and small species of dwarf habit, with pure white trumpet and perianth; recommended for naturalising — 1/6
- * **Mrs. Walter T. Ware**, one of the best *Bicolors*, fine white perianth, with beautifully recurved golden yellow trumpet; very early 8/6 1/3
- * **Obvallaris** (Tenby Daffodil), bright yellow, one of the earliest to bloom, short, well-expanded trumpet with broad short perianth; excellent for forcing and cutting. Height 12 in. 6/- -/10
- Per 100. Per doz.
- * **Princes**, large yellow trumpet, with sulphury white perianth, excellent for forcing or cutting; a fine Daffodil for naturalising. Strong Bulbs. per 1,000, 35/- 4/- -/8
- Princess Ida**, white perianth with elegantly frilled white trumpet edged golden yellow — 2/6
- Pseudo-Narcissus** (Single Daffodil or Lent Lily), yellow trumpet, sulphur perianth; fine for naturalising in woodlands, &c. per 1,000, 18/- 2/- -/5
- Silver Spur**, a fine *Bicolor*, as early as *Golden Spur*; erect flowers borne on long stems 18/6 2/6
- * **Spurius**, large, well-opened trumpet, and broad perianth of a pleasing self yellow colour; recommended for planting in woodlands 5/6 -/10
- * **Telamonius Plenus** (Common Double Daffodil), large, double, deep golden yellow flowers; showy for outdoor planting, and excellent for pot culture or forcing
Strong Bulbs for Planting per 1,000, 45/- 5/- -/10
Extra Strong Bulbs for Forcing ,, 60/- 7/- 1/-
- Van Dyck**, very early, fine for forcing; perianth and trumpet pale yellow 11/- 1/6
- * **Victoria**, immense flowers of excellent quality, trumpet rich clear yellow, perianth snowy white; a very strong grower, and useful for pot work 6/6 1/-

Trumpet Daffodils, Mixed, see page 2.

GLORY OF LEIDEN.

DAFFODILS OR NARCISSI.

SECTION II.—MEDIUM CROWNED.

The varieties marked with an asterisk (*) are suitable for pots as well as for the border.

Flowers with the crown or trumpet not more than half the length of the divisions of the perianth.

The section embraces many very beautiful and effective varieties, which commence flowering in March, succeeding those of the preceding group, the first to bloom.

NARCISSUS INCOMPARABILIS, LEEDSII, &c.

Per 100. Per doz.

Ariadne (<i>Leedsii</i>), very handsome refined flower, perianth pure white with ivory-white cup prettily frilled at margin	—	6/6
Autocrat , broad full yellow perianth, with well expanded yellow cup	5/6	-/10
* Barrii conspicuus , deep primrose perianth, with yellow crown, conspicuously edged with orange-scarlet	3/-	-/6
* Beauty , perianth sulphur-yellow with deep yellow markings, large yellow cup, margined orange-scarlet	8/6	1/3
C. J. Backhouse , a very beautiful flower, perianth yellow, with a long large bright orange-scarlet cup	9/6	1/4
Cristata , very large flower, with sulphur-yellow perianth and large yellow-crested cup of fine substance	—	7/6
Cynosure , large sulphury white perianth, with conspicuously-stained orange-scarlet crown	per 1,000, 25/-	2/9
* Dorothy T. Wemyss (<i>Barrii</i>), an attractive variety, large white perianth, cup canary-yellow, edged orange-scarlet	—	5/-
Double (Butter and Eggs), large double pale yellow and orange flowers; effective and free-growing variety	3/6	-/8
Duchess of Brabant (<i>Leedsii</i>), elegant white perianth, with small citron cup, a charming variety	2/6	-/6
* Duchess of Westminster (<i>Leedsii</i>), very large flower with pure white perianth and canary-coloured crown, tinged orange on first expanding	30/-	4/-
Flora Wilson (<i>Barrii</i>), an attractive and beautiful flower, white perianth, cup deeply stained orange-scarlet	12/6	1/9
Frank Miles , large soft clear yellow, elegantly twisted perianth	6/6	1/-
Homespun , soft primrose-yellow, one of the most beautiful of the <i>Incomparabilis</i> section	—	—
Katherine Spurrell (<i>Leedsii</i>), large broad silvery white perianth, with delicate lemon-coloured cup, large well-shaped flower; fine for cutting	18/6	2/6
* Lulworth , pure white perianth, cup bright orange-red, very beautiful. First Class Certificate, R.H.S.	—	3/-
* Minnie Hume (<i>Leedsii</i>), broad white perianth, with delicate pale lemon cup, shaded deeper lemon at edge. First Class Certificate, Royal Horticultural Society	3/6	-/6
M. Magdaline de Graaff (<i>Leedsii</i>), white perianth, with delicate apricot cup; very pleasing and effective, usually two flowers on a stem; late flowering	6/-	-/10
* Mrs. C. Bowley (<i>Barrii</i>), pure white perianth, glowing orange-red cup, very beautiful; one of the best of the <i>Barrii</i> section	22/6	3/-
Mrs. Langtry (<i>Leedsii</i>), pure white perianth, large white cup edged canary-yellow. First Class Certificate, R.H.S.	3/6	-/6
Nelsoni aurantius , broad pure white stout perianth, long yellow tube deeply suffused with bright orange-scarlet	—	4/-
Orange Phoenix (Eggs and Bacon), large double white flowers interspersed with rich orange segments in the centre, very attractive. Height 16 in.	5/-	-/9
Peach (<i>Leedsii</i>), pure white perianth, long crown of a delicate apricot-orange, a very beautiful flower	—	8/6
* Princess Mary , immense silvery white perianth with a large spreading yellow crown of fine form. Height 16 in.	15/-	2/3
* Red Star (<i>Incomparabilis</i>), very strong, perianth creamy white, cup stained brilliant red	each, -/9	8/6
Seagull (<i>Barrii</i>), large pure white perianth, cup yellow, edged apricot	each, -/8	7/6
* Sir Watkin , a splendid variety, cup elegantly fringed and of a rich golden yellow; perianth pale primrose	6/6	1/-
Extra strong bulbs	8/6	1/3
Starlight , one of the most brilliant of the <i>Incomparabilis</i> type, the bright orange crown contrasting well with the white perianth; averaging five to six flowers on each stem	—	8/6
* Stella , very early, flowers pure white with a yellow crown; excellent for naturalising	per 1,000, 22/6	2/6
superba , flowers more than twice the size of <i>Incomparabilis</i> <i>Stella</i> ; large white perianth with yellow cup	7/-	1/-
* Sulphur Phoenix (Codlins and Cream), a beautiful double variety; flowers pale creamy white, delicately fragrant	8/6	1/3
White Lady (<i>Leedsii</i>), large white perianth, cup pale yellow, very free bloomer. Award of Merit, K.H.S.	each, -/9	8/6

PRINCESS MARY.

DUCHESS OF WESTMINSTER.

DAFFODILS OR NARCISSI.

SECTION III.—SMALL CROWNED.

This section contains the true *Narcissus*, of which the common *Poeticus* is the type; all very beautiful and perfectly hardy.

	Per 100.	Per doz.
Burbidgei , early flowering, in the way of <i>Poeticus</i> , perianth white with yellow crown, deeply edged scarlet per 1,000, 21/-	2/6	-/6
Firebrand , creamy white perianth, cup fiery red	—	8/6
Poeticus (Pheasant's Eye or Poet's Narcissus), a well-known hardy species, pure white, perianth rather reflexed with red crown, fine for cutting and for massing in woods, etc.

Queen Anne's Double Jonquil (<i>Narcissus odorus minor plenus</i>) each, -/6	—	5/-
The Silver Jonquil (<i>Narcissus Tenuior</i>), silvery white flowers on slender stems; of dwarf growth	15/-	1/9

NEW AND CHOICE DAFFODILS.

	Each.
Apricot , very distinct shade, trumpet opens a light primrose passing to apricot-buff. Award of Merit, R.H.S.	1/-
Cassandra (<i>Poeticus</i>), one of the finest of this section; flowers large and of fine substance, crown deeply edged dark red. Award of Merit, R.H.S. per doz., 10/6	1/-
Cresset (<i>Engleheartii</i>), broad white perianth, flat golden cup, margined scarlet, very showy flower of perfect form	2/-
Duke of Bedford , a magnificent flower of fine substance, perianth pure white, trumpet clear yellow	5/6
Gloria Mundi (<i>Incomparabilis</i>), very large flower, with clear yellow perianth, and expanded orange-scarlet cup, extra fine. First Class Certificate, R.H.S., per doz., 12/-	1/3
King Alfred , a remarkably fine variety, flowers of large size, great substance and of a clear golden yellow. First Class Certificate, Royal Horticultural Society. See illustration	4/-
Lady Margaret Boscawen (<i>Incomparabilis</i>), a very handsome large flower, with broad pure white perianth and bold expanded golden yellow crown	6/-

	Each.
Lord Roberts , very large golden yellow trumpet, with fine broad perianth; very free flowering	10/6
Lucifer (<i>Incomparabilis</i>), very free-flowering, handsome white perianth, with deep orange-red cup per doz., 12/-	1/3
Mrs. H. J. Veitch , golden yellow trumpet, broad pale yellow perianth, very handsome free-flowering variety	1/3
Primrose Phoenix (<i>Incomparabilis</i>), splendid large double rose-shaped flowers, pale lemon shade, excellent for cutting	2/6
Van Waveren's Giant , this magnificent new variety is probably the largest trumpet Daffodil yet introduced; it is of a beautiful rich yellow colour, and of great substance	17/6
Weardale Perfection , large white perianth, trumpet primrose, very large flower of refined beauty. First Class Certificate, Royal Horticultural Society	5/-
White Queen (<i>Ledra</i>), an exquisite and very refined pure white bloom, resembling <i>Sir Watkin</i> in form, very sturdy grower	12/-
Will Scarlett (<i>Incomparabilis</i>), fiery orange-red cup, perianth creamy white, a very fine and striking variety	8/6

See also special offers of Daffodils and Narcissus on page 2.

NARCISSUS POLYANTHUS.

A fine decorative class of plants, particularly suitable for pot culture, producing abundantly large trusses of very sweet-scented flowers varying in colour from pure white to deep golden yellow. They are of easy cultivation and excellent for forcing, particularly Double Roman, Paper White, and early Snowflake, which may be had in bloom by Christmas. The same treatment may be observed as for Hyacinths, except that the bulb may be planted deeper in the soil.

NARCISSUS POETAZ.

NEW HYBRID NARCISSUS POLYANTHUS.

Per doz.

Alsace , pure white perianth with yellow eye, broad truss with three flowers on a stem; forces well. Award of Merit, Royal Horticultural Society	1/6
Aspasia , perianth pure white, cup yellow, true <i>Poeticus</i> form	1/6
Elvira , very decorative for pots or borders, three or four flowers on long stems, pure white perianth, cup golden yellow edged with orange. Award of Merit, Royal Horticultural Society. See illustration	per 100, 10/6
Irene , pale primrose perianth and fluted deep yellow cup	2/-
Klondyke , fine yellow self	3/-
Triumph , fine large white with deep yellow eye	3/-

They are also effective planted out in clumps of three to five bulbs each, and thrive in almost any situation.

	Per 100.	Per doz.
Early Double Roman , white with orange nectary, free flowering and excellent for very early forcing	6/-	1/-
Early Paper White , pure white, early, excellent for forcing, largely grown for market purposes	6/-	1/-
Early Snowflake , a greatly improved form of the <i>Paper White</i> ; more vigorous in growth, producing much larger trusses of bloom. The individual flowers are also of stouter substance and more durable; invaluable for early forcing	7/6	1/3
Bazelman Major , pure white, with yellow cup, large bold flower, very sweet scented, splendid truss	—	3/-
Fleur Parfaite , pale sulphur, with rich orange round cup, dwarf habit and extremely free flowering	—	4/-
Gloriosa , pure white, with deep orange cup; an excellent free-flowering sort, fine large trusses	8/6	1/3
President Harrison , pale yellow perianth, rich orange cup	—	2/6
Grand Monarque , pure white, with citron cup, large and handsome flower, splendid truss. See illustration	10/6	1/6
Her Majesty , pure white, with yellow cup; very fine	—	1/9
Jaune Supreme , clear yellow, large truss	12/6	1/9
Maestro , pure white, with rich orange cup	—	2/6
Mont Cenis , pure white, with rich yellow cup, fine truss	—	1/6
Soleil d'Or , rich yellow, with orange cup	8/6	1/3
White Perfection , very beautiful, pure white	—	2/-
Fine Mixed , very useful for growing and cutting	5/-	1/-

NARCISSUS POETAZ ELVIRA.

BULBS IN BOWLS.

This interesting method of growing spring-flowering bulbs, especially for those who have not the convenience of a greenhouse, is now very popular, and we offer a selection of Fancy Vases and Bowls suitable for this purpose.

Our specially prepared Moss Fibre is odourless and clean to handle.

The vases and bowls having no drainage, and being non-porous, are very suitable for Drawing-room and Table Decoration, and the bulbs when in flower make a most charming display.

The following bulbs are recommended as among the most suitable for the purpose, although many others are amenable to this treatment:—Roman Hyacinths; Paper White, Soleil d'Or and Grand Monarque Polyanthus Narcissus; Elvira and Alsace Poetaz Narcissus; Obvallaris, Henry Irving, Golden Spur, Empress, Mrs. Langtry, Barrii Conspicuus and Sir-Watkin Narcissus; Miniature Hyacinths; Scarlet Duc Van Thol, Vermilion Brilliant, Prince of Austria, Cottage Maid and White Joost Van Vondel Tulips, etc.

CULTURE.—Moisten the fibre **before** use, and break up any lumps. Place a few pieces of charcoal at the bottom of the bowl, and put from one to three inches of the fibre, according to the depth of the bowl. Place the bulbs on the fibre, and fill up to within a half or one inch of the rim. The fibre must not be pressed at all tightly or the bulbs will be forced upwards when growth commences. If the fibre has been properly moistened the bulbs will require little or no attention for the first two or three weeks, during which time the bowls may be placed in any airy position, cellar, or room in a subdued light, but they should not be put in a close cupboard. Directly growth commences the bowls must be examined every week and watered as required, as **if the fibre is once allowed to get dry the flower buds will go blind.** If too much water has been given, that is to say more than the fibre will absorb, the bowls may be tipped carefully, and the surface water allowed to drain off. When the bulbs have made about an inch of growth they should be given more air and light, to prevent the foliage being drawn.

Special Mixture of Moss Fibre, Shell and Charcoal, to be used in bowls. Per peck, 1/3; per bushel, 3/6.

CHINESE SACRED NARCISSUS.

The Chinese Emblem of Good Luck.

Grow in bowls filled with pebbles and water; a few pebbles or stones should be placed round the bulbs to prevent them from falling over when in flower.

Each, 6d.; per dozen, 5/-

VEITCH'S EXTRA CHOICE EXHIBITION HYACINTHS.

The finest varieties in cultivation. Arranged to produce a well-assorted variety of shades of colour, and specially selected for exhibition.

Veitch's Selection of the 12 Best Exhibition Hyacinths 9/-

Veitch's Selection of the 25 Best Exhibition Hyacinths 18/-

VEITCH'S NAMED HYACINTHS.

Having made a very careful inspection of the stocks of the leading growers in Holland, and after repeated trials in our own grounds, we have discarded many of the older varieties and consider the following list of Hyacinths contains all the best varieties in cultivation. The single varieties produce larger trusses and bloom more regularly than the double.

Those marked with an asterisk (*) are the best for exhibition.

RED HYACINTHS.

	Each.
Baron Van Tuyll , pale rose, large compact spike, early	-/5
* Cardinal Wiseman , light rosy pink, large splendid spike	-/6
* Queen of the Pinks , bright pink, large compact spike	1/6
* Fabiola , pale rose, striped with pale pink, large bells, handsome truss	-/5
* Garibaldi , rich bright crimson, carmine centre, magnificent spike	-/7
* General Pelissier , bright crimson, splendid large spike	-/5
* Gertrude , rose-pink, large and fine truss, splendid for pots or beds	-/4
* Gigantea , delicate rose, immense spike, medium bells, very sweet scented	-/5
Groot Voorst (<i>semi-double</i>), blush, tinged buff, large compact spike	-/6
* Jacques , blush-pink, immense truss, extra fine for exhibition	-/6
* King of the Belgians , handsome brilliant scarlet, fine close truss of medium-sized bells; one of the best of the dark varieties	-/5
* Koh-i-noor (<i>semi-double</i>), bright salmon-pink, large bells, of good substance, grand truss; very fine flower	-/7
Lady Derby , beautiful rose-pink, large truss; an improved <i>Gigantea</i>	-/9
* La Superbe , clear pink with crimson stripe, extra fine spike	1/3
* La Victoire (new), bright crimson, long compact spike, fine for exhibition	1/-
* L'Ornement Rose , clear bright rose, large close spike, very fine	-/5
* Lovely , beautiful blush variety, splendid bells and truss; excellent for exhibition	1/-
* Moreno , beautiful waxy blush, large bells and truss; an improved <i>Norma</i>	-/6
Noble Par Merite (<i>double</i>), light rose with bright pink stripe, large bells	-/5
* Novelty (<i>double</i>), superb rose, dark centre, extra fine bells and spike	1/6
* Pink Perfection , clear pink, large well-formed spike and bells	-/8
Robert Steiger , bright crimson, compact spike of medium size	-/4
Rosea maxima , delicate soft rose, large bells and fine spike	-/6
* Rose Pompom , lovely rose, deep stripe, large compact spike	-/10
* Ruby Queen , brilliant dark red, compact spike	1/-
* Vuurbaak , beautiful bright crimson, compact truss; extra fine	-/8

YELLOW HYACINTH, CITY OF HAARLEM.

WHITE HYACINTHS.

	Each.		Each.
* Avalanche , pure white, large bells, long spike	1/-	* La Tour d'Auvergne (<i>double</i>), early, very fine truss, fine for forcing; one of the best double whites	-/6
* Baroness Van Tuyll , white, primrose eye, large spike	-/5	* L'Innocence , pure white, extra large bells, very handsome	-/6
Blancheur a Merveille , splendid pure white	-/7	Madame van der Hoop , pure waxy white, large handsome spike	-/6
Bouquet Royal (<i>double</i>), pure white, very double, fine spike	-/6	* Mimi , creamy white, large and handsome spike	-/6
British Queen , pure white, splendid broad truss	-/8	* Mr. Plimsoll , ivory-white, large bells, fine spike	-/5
* Duke of Clarence , fine waxy white, extra large bells and spike	1/6	* Princess Amalia , blush-white, large and handsome spike	-/10
* General Vetter , extra fine pale blush, good spike; early	-/7	* Queen of the Whites , large spike of handsome shape	1/-
* Isabella (<i>double</i>), blush-white, large spike with immense bells	-/6	* Royal Bride , pure white, extra large bells and compact truss	1/3
* La Franchise , creamy white, large bells, fine spike	-/5	* White Perfection , pure white bells, grand truss	1/-
* La Grandesse , the finest pure white variety, immense bells	-/7		

YELLOW HYACINTHS.

	Each.
* City of Haarlem , clear yellow, splendid spike. See illustration	1/-
* King of the Yellows , pure yellow, large fine formed bells, of good substance, late flowering; small bulb	-/6

	Each.
* Primrose Perfection , pure yellow, large broad spike	-/9
* Sovereign , clear deep yellow, splendid spike	1/-
* Yellow Hammer , pale yellow, extra fine spike	-/6

BLUE HYACINTHS.

	Each.
* Baron Van Tuyll , bright dark blue, extra large spike	-/5
* Bloksberg (double), clear marbled porcelain, shaded blue, large bells and fine truss, delicate and pleasing shade	-/6
* Blondin , silvery grey, tube mottled lilac, large bells	-/5
* Captain Boyton , deep porcelain, immense truss, fine	-/6
* Celestial , clear light blue, with mauve stripe, large bells	1/3
* Enchantress , pale porcelain-blue; one of the best	-/8
* Garrick (double), lilac-blue, large bells, splendid truss	-/6
* General Gordon , fine dark blue, handsome truss	1/3
* General Havelock , brilliant deep purple, shaded with black	-/8
* Grand Lilas , porcelain-lilac, large bells, grand spike	-/6
* Grand Maitre , sky-blue, shaded with violet-blue, large bells	-/5
* Ivanhoe , dark blue, very fine spike	1/6

	Each.
* King of the Blues , beautiful clear dark blue, large bells, splendid long compact spike; extra	-/5
* L'Esperance , bright claret-crimson, compact spike, distinct	-/8
* Lord Balfour , a mauve-coloured variety, distinctly striped	-/6
* Lord Derby , clear azure-blue, fine bells, splendid truss	-/7
* Lothair , clear light azure-blue, splendid spike	-/9
* Magnificent , fine pale blue, with darker stripe, large truss	1/3
* Marie , very dark, shaded, large bells, fine close spike	-/4
* Menelik , best of the dark varieties, splendid truss	-/10
* Perle Brilliant , pale blue, shaded porcelain, large bells and spike	-/9
* Prince of Wales , dark blue, with pure white eye	-/7
* Queen of the Blues , sky-blue flowers, immense spike	-/6
* Rear Admiral , light blue, large and compact truss	1/-
* Schotel , pale porcelain-blue, handsome spike	-/7

CHEAP NAMED HYACINTHS FOR POTS OR BOXES.

Fine Bulbs of the following free-flowering varieties.

Baron Van Tuyll, bright dark blue
Charles Dickens, lilac-blue
Coquette, bright pink
Elaine, pure white
Fabiola, creamy pink
General Pelissier, bright crimson
Gertrude, clear pink
Gigantea, delicate rose

Grandeur a Merveille, bluish-white
Her Majesty, light blue
Jeanne d'Arc, pure white
Leonidas, bright blue
Lord Canning, porcelain
Marie, dark blue
M. de Lesseps, blue-black
Primrose Perfection, pale yellow

Reine Blanche, pure white
Reine des Fleurs, bright crimson
Rosa Bonheur, white
Rosine, rosy pink
Royal Blue, dark blue
The Bride, white
Yellow Prince, rich yellow

Per dozen, 4/-; per 100, 30/-

For Collections of the above and other fine kinds, see page 12.

HINTS ON THE CULTURE OF THE HYACINTH.

HYACINTHS IN POTS.—One of the most important considerations in the Pot Culture of the Hyacinth is to have a good rich light soil, and the following will be found an excellent compost: one third rich loam full of fibre, one third well-decayed cow manure, and one third leaf mould and river sand in equal proportions. This mixture should be put together, and allowed to stand a month or more before being used. In potting, leave the top of the bulb level with the surface of the soil, which should be moderately moist, and should not be pressed too firmly. After potting, place on a bed of ashes, and cover with cocoa-nut fibre refuse to a depth of four or five inches. When well rooted, which will be in four or five weeks, remove to a cold pit or frame and thence to the forcing house as required; but **care should always be taken that the Bulbs are well rooted before beginning to force**, as successful cultivation depends almost entirely on strict attention to this point.

The best time for planting the general collection is in October, but for early forcing a batch may be planted in September; late planting is not advisable, as the bulbs begin to deteriorate, and a late supply of bloom can be had by keeping them in a cold frame till wanted. To keep the foliage dwarf, and perfect the colouring of the flowers, Hyacinths when growing should have a liberal supply of manure water, plenty of air, and be kept as near the glass as possible. A slight shade during the time of flowering lengthens the period of blooming.

HYACINTHS IN GLASSES.—The single varieties are more generally used for this purpose, as they produce finer spikes of bloom than the double. The mode of procedure is as follows:—Fill the glass with clear water so as almost to touch the base of the bulb, putting a small piece or two of charcoal in each glass, as this is of service in keeping the water pure, and gives some slight nourishment to the roots. After having filled the glasses they should be placed in a cool dry dark place for a month or more, till the roots nearly touch the bottom of the glass, when they may be brought gradually to the light, afterwards giving them plenty of light and air, but avoiding all draughts. Always keep the water in the glass up to the proper level, and brush off any fungus or decayed skin from the roots or bulbs while growing. The water does not require changing unless it begins to smell, or the roots assume an unhealthy appearance. When of sufficient height the flowers should be supported by wires to prevent them overbalancing.

VEITCH'S BRILLIANT SINGLE TULIPS FOR BEDDING.

ALL FLOWERING AT THE SAME TIME.

Plant in the open ground during October and November in rich, sandy and well-drained soil. Excessive moisture is injurious. The bulbs should be planted from 5 to 6 inches apart, and from 3 to 4 inches deep.

Per 1,000. Per 100.

EARLY SINGLE TULIPS.

We strongly recommend the following varieties selected from a large collection grown at our Feltham Nurseries. For outdoor spring decoration nothing equals the grand effect produced by well arranged masses of these beautiful flowers.

Numbers have been placed after each variety to indicate the order of their flowering. Those marked (1) bloom simultaneously, and are followed by (2), (3) and (4), making a splendid display admirably adapted for beds.

When grown in pots from three to five bulbs should be placed in each pot, the soil and treatment being the same as for Hyacinths.

DUC VAN THOL TULIPS.

Very dwarf habit. Exceedingly useful for early forcing.

Fine Mixed, a good mixture of all colours, suitable for extensive planting in borders, &c.

per 1,000, 45/- 5/- -/9
 „ 32/6 3/6 -/8

DOUBLE TULIPS.

An exceedingly useful and beautiful class of Tulips. The varieties, such as *Salvator Rosa* and *Tournesol* are admirably adapted for forcing. Many of the other varieties make a fine display when grown in pots, but they require to be forced slowly. The later sorts, such as *La Candeur*, *Rubra maxima*, *Vuurbaak*, &c., are very effective in beds or borders.

VEITCH'S SELECTIONS OF SHOWY DOUBLE TULIPS.

Per 100. Per doz.

Roses , white ground, with scarlet, pink or red markings	6/-	1/-
Extra Fine Mixed , all colours	4/-	-/8

DARWIN TULIPS (May Flowering).

We strongly recommend this late-flowering section of self-coloured Tulips, which deserve universal attention for borders and also for indoor decoration. The tall and sturdy habit of growth is a great attraction, but their chief merit lies in the really charming shades of colour to be found among them. We have selected the following varieties as the choicest of the very large number now in cultivation. This section may also be gently forced for flowering in March, and when cut they last a long time in water.

DARWIN TULIP, BARONNE DE LA TONNAYE.

	Per 100.	Per doz.
May Queen , large flower, soft rose, centre blue and white blotches. Award of Merit, R.H.S.	8/6	1/3

Azureum, handsome deep blue flowers, quite hardy. Height 2 ft.
Hermetti grandiflorum, pure white, forces well, inodorous and very beautiful; the flowers are much larger than the common variety
Moly (*astrucum*), bright yellow flowers, very hardy. Height 1 ft.

	Per 100.	Per doz.
—	2/-	
—	2/-	
3/-	-4	
2/3	-4	

ANEMONE JAPONICA.

Neapolitanum, this useful variety has large heads of pure white flowers, hardy, extensively forced for Covent Garden Market for bouquets, &c.; it is also useful for naturalising in shady woods. Height 15 in.

per 1,000, 22/6 **2/6** -4

Ostrowskianum, large umbels of purplish red flowers; an excellent early free-flowering species, hardy and beautiful; a most desirable variety. Height 8 in.

4/- **-8**

ANEMONE JAPONICA.

Very showy, free-flowering, hardy herbaceous plants, growing 1½ to 2 ft. in height, producing in the autumn an abundance of their beautiful large single red and pure white flowers, which, if frost does not set in, may be obtained in profusion until nearly Christmas.

Per doz.

Japonica , rich carmine colour within and rose without, with a conspicuous tuft of golden anthers; very pretty and distinct variety	5/-
Japonica alba (Honore Joubert), pure white; fine for cutting	5/-
Japonica Lady Ardilaun , pure white, strong habit, larger leaves and flowers than the variety <i>alba</i>	5/-
Japonica rosea , very pretty pale rose-coloured flowers, showy and free-flowering	5/-

ANEMONES.

The Anemone is unsurpassed among spring flowers for brilliancy of colour, profusion and duration of bloom, is neat and compact in growth, with elegantly lacinated foliage, and produces in great abundance self-coloured and striped flowers of the most vivid hues of scarlet, blue and purple. These have a splendid effect in beds and masses, and for cutting for bouquets or table-decoration are invaluable.

SINGLE ANEMONES.

	Per 100.	Per doz.
Single, finest mixed, including many beautiful shades	2/3	-/5
Single Scarlet, brilliant and effective for bedding	3/-	-/6
Single Blue, a charming variety for beds or clumps	3/-	-/6
Single Pure White (The Bride), very fine for cutting	2/6	-/5

GIANT FRENCH POPPY ANEMONES.

Empress, Victoria Giant or Caen.

Producing flowers of enormous size, and large rounded petals, sometimes measuring 4 inches across; they have a great range of colour, are free-flowering, and very showy as cut flowers.

Per 100, 3/6; per doz., -/6

ST. BRIGID ANEMONE

"The Irish Anemone."

See illustration.

A very beautiful free-flowering strain, of robust habit of growth, containing many brilliant shades of colour. The flowers are large and mostly semi-double. Selected Roots.

Per 100, 7/6; per doz., 1/3

CHOICE DOUBLE ANEMONES.

The following are the finest and most distinct varieties, with large, full double flowers, especially selected for brilliancy of colour and beauty of form. They are highly recommended for massing in beds or borders and are also decorative for cutting purposes.

	Per doz.
Ceres, white, lightly shaded soft rose, very pleasing shade	1/6
High Admiral, brilliant vermilion-scarlet, fine for cutting	1/6
King of Scarlets, rich scarlet flowers of good substance and perfect form	4/-
La Brillante, rich crimson-scarlet, very effective colour	2/6
Titians, bright rosy red, large well-formed flower	2/-
White Lady, pure white, distinct shape, very beautiful	2/6
100 Superfine New and Choice Double Anemones in 12 named varieties,	7/6

ST. BRIGID ANEMONE.

DOUBLE ANEMONES.

Very showy and free-flowering, fine for beds or masses.

	Per 100.	Per doz.
Double, finest mixed, embracing all the best kinds	3/6	-/6
Double Scarlet, fine for massing in beds or borders	5/-	-/9
Double Blue, a very beautiful variety, fine for beds	5/-	-/9

DOUBLE CHRYSANTHEMUM-FLOWERED ANEMONES.

This fine section differs from the Dutch varieties in the petals being all of the same shape and regularly imbricated, like those of the Chrysanthemum-flowered Aster. The plants are very vigorous and free-flowering.

Finest mixed, including many beautiful varieties, per 100, 10/-; per doz., 1/6.

The following two varieties are extensively cultivated in the South of France. They are particularly recommended for cutting purposes.

	Per 100.	Per doz.
Chapeau du Cardinal, brilliant scarlet, free-flowering	8/6	1/3
Rose de Nice, beautiful soft rose colour, very delicate	7/6	1/-

ANEMONE FULGENS.

The most brilliant and effective of all single Anemones. It is quite hardy, commencing to bloom in February and March, the flowers which are very freely produced being of a dazzling vermilion-scarlet with a jet-black centre, excellent for cutting.

The roots should not be planted when the ground is wet.

Fulgens, extra strong cultivated roots; true per 100, 7/6; per doz., 1/3

Fulgens grandiflora (*Grieca*), a magnificent variety, the same colour as *A. fulgens*, but superior in size of flower, and having much broader rounded petals

" 2/-

DOUBLE ANEMONES.

ALDBORO' ANEMONES.

A gorgeous and beautiful race of Single Anemones, blooming abundantly in early spring. The flowers somewhat resemble *A. fulgens*, are larger, with longer, broader, rounded petals of stout substance, and are remarkable for richness and beauty of colouring, generally with a clearly defined white ring in the centre, forming a striking contrast, and generally enhancing the effect.

Per 100, 15/-; per doz., 2/-

SINGLE PEACOCK ANEMONES

(*A. STELLATA*):

These beautiful Anemones, the Starry Wildflower of the Riviera, are found growing in the neighbourhood of Nice, Cannes, and Mentone; they are early spring flowering, exceedingly floriferous, and of various colours.

Superb mixture of beautiful varieties,
per doz., 1/-; per 100, 6/6

ANEMONE PULSATILLA. See page 28.

ANEMONES, VARIOUS, Dormant Roots.

Apennina (The Blue Wood Anemone), beautiful sky-blue flowers; one of the prettiest and earliest. Height 6 in.	per 100, 3/6	Per doz. -/6
Apennina alba , pure white, very beautiful, fine for shaded positions	" 6/6	1/-
Blanda (Blue Grecian Windflower), deep blue, very early. Height 3 in.		2/-
Nemorosa (White Wood Anemone), free flowering, splendid for naturalising. Height 6 in.	" 8/6	1/3
Nemorosa alba plena (Double White Wood Anemone), a charming variety with snow-white double flowers. Height 6 in.	" 10/-	1/6
Nemorosa Robinsoniana , the sky-blue variety of the Wood Anemone, very beautiful. Height 6 in.		3/-
Palmata , large bright yellow flowers, suitable for rockwork. Height 9 in.		3/-
Pulsatilla (The Pasque Flower), flowers deep purple, with long silky hairs on the stems and foliage; free-flowering. See illustration, page 27		2/6
Ranunculoides (The Yellow Wood Anemone), pretty dwarf species, flowering in March and April. Height 4 in.		-/8

CALOCHORTUS VESTA.

BABIANAS.

In growth these resemble the Sparaxis and Tritonia, but differ in the foliage, which is covered with greyish down. The flowers are large, showy, and of the most intense and beautiful colours. Culture, the same as for Ixias.

Atrociana , blue	Per doz. 2/-
Speciosa , large, dark blue	2/-
Mixed , very choice	per 100, 7/- 1/-

BRODIEA.

Beautiful hardy bulbs, well adapted for a south border or rockwork, flowering in June or July.

Coccinea (Fire Cracker), crimson flowers, tipped green	Per doz. 4/-
Congesta , large umbels of lilac-blue flowers	per 100, 6/6 1/-
Grandiflora , flowers bright blue; dwarf plant, very pretty	-/9
Ixioides , light yellow flowers, striped chestnut. See illustration	4/-
Laxa , fine purple, lasting a long time in flower	per 100, 7/6 1/-

CALOCHORTUS, "Mariposa Lily."

A very distinct and beautiful class of bulbs from California; they should be planted from September to November, 3 inches deep, in light sandy soil and a dry sunny situation.

Splendens , pale lilac, very free flowering	Per doz. 2/6
Venustus Vesta , rosy white, with brown and yellow base. See illustration	2/9
Venustus citrinus , deep rich lemon with dark maroon blotch	2/-

BRODIEA IXIOIDES.

CALOCHORTUS, "Star Tulips."

Albus (White Globe Tulip), pearly white pendant flowers, very pretty	1/9
Amabilis (Yellow Globe Tulip), golden yellow, one of the finest and hardiest	1/9
Amoenus (Pink Globe Tulip), rich pink, a most beautiful form	4/-
Pulchellus , true, very beautiful large lemon-yellow flower	4/-
Mixed Varieties, Eldorado Strain	2/-
Mixed Varieties, all sections	per 100, 10/6 1/6

CAMASSIA.

Cusickii , fine spike of large lavender flowers with yellow anthers, strong grower, somewhat resembling a small spike of Eranthis. See illustration	per 100, 27/6 4/-
Esculenta , a pretty dark blue hardy spring-flowering plant, somewhat resembling a large form of Scilla in general appearance. Height 1½ ft.	per 100, 2/6 -/6

CAMASSIA CUSICKII.

CHIONODOXA (Glory of the Snow).

CHIONODOXA LUCILIAE.

The full beauty of this most exquisite early spring-flowering plant is only obtained when home-cultivated bulbs are grown; these produce strong large flower spikes, bearing from ten to fifteen lovely flowers of a beautiful and intense blue with a white centre. It is thoroughly hardy, will thrive well in any soil, and is admirable for pot culture.

Per doz.

Luciliae, bright sky-blue with conspicuous white centre, one of the most charming of early spring flowers; it flowers freely and produces a splendid effect when grown in large clumps, planted in rockwork, or used as edging for borders, &c. Strong Cultivated Roots, per 1,000, 27/6; per 100, 3/- -/6
Extra Large „ 37/6; „ 4/- -/8

Sardensis, very beautiful flowers, somewhat smaller than the *C. Luciliae*, a deep rich blue with a small white spot, per 100, 3/6 -/6

Gigantea, the flowers of this beautiful species, which are much larger than those of *C. Luciliae*, are of a charming soft grey-blue shade with pure white eye; a valuable addition to this class of plants per 100, 5/- -/10

CROCUS.

Crocuses are among the earliest and most popular of spring flowers, thriving in almost any soil or situation, and should be extensively planted. The flowers are rich and diversified in colour, very effective in mixed beds and clumps, and particularly as an edging to beds or borders. They have a charming effect when planted in grass in clumps, either alone or with Snowdrops, *Scilla sibirica*, and other early spring flowers.

Crocuses should not be planted deeply but only just covered.

CROWN IMPERIAL.

COLCHICUMS NATURALISED.

CYCLAMEN.

These winter and spring-flowering plants of very distinct character and compact habit, are of great beauty, and most easily cultivated. The colours range from deep shades of red and purple through many charming intermediate tints of pink and rose to pure white; some are sweet scented, and the foliage in most cases is beautifully marked or variegated. The plants remain in bloom a long time, and are useful for indoor decoration.

Each.

Persicum grandiflorum (dormant corms), a very large-growing variety, of improved form, having broad massive petals **per doz., 15/-** 1/6

Giant varieties, in assorted colours, plants established in pots in flower, or coming into bloom in November, December and January 2/- to 2/6

CYCLAMEN, HARDY SPECIES.

These charming hardy plants, remarkable for graceful flowers and prettily marked foliage, are suitable for growing on rockwork or for naturalising in half-shady places, where they form elegant objects if left undisturbed. They require a perfectly drained soil and a little shelter in the winter.

Per doz. Each.

Atkinsii album (*Ibericum*), pure white flowers, produced very freely in winter and early spring; perfectly hardy **10/6** 1/-

Atkinsii roseum and rubrum, comprising many various shades of rose and red, foliage beautifully marbled; early spring flowering **10/6** 1/-

Atkinsii Seedlings, mixed shades of colour **4/6** -/6

Coum, deep crimson flowers, with dark plain foliage; flowers in February **6/6** -/8

Europæum, reddish purple flowers, very free; should be planted in shady position; flowers in autumn **3/6** -/4

Neapolitanum (*Hederacfolium*), large mottled foliage, very handsome, should be planted in warm corners of rockwork; autumn-flowering **5/-** -/6

Repandum, very pretty, bright crimson flowers this charming variety will thrive best in a sheltered position; flowers in May **5/6** -/6

CYCLAMEN, VEITCH'S GIANT WHITE.

ERYTHRONIUM, "Dog's-tooth Violet."

Exceedingly ornamental early-flowering dwarf plants, with beautiful spotted foliage, thriving best in a partially shaded and moist situation.

Giganteum, flowers bright yellow with orange markings at base; leaves beautifully mottled. Height $\frac{3}{4}$ ft.

Grandiflorum, very distinct, bright golden yellow with dark green foliage, very robust growing. Height $\frac{3}{4}$ ft.

Grandiflorum La Candeur, very large pure white flowers, very beautiful variety

Grandiflorum Matador, very elegant and free-flowering with light rose flowers with distinct foliage

Hartwegii, large light yellow flowers; very early

Revolutum, beautifully shaped flowers, creamy white with orange base; very fine late flowering

FREESIA REFRACTA ALBA.

FREESIAS.

These are among the most beautiful of all Cape bulbs, growing about 15 inches in height, and producing six to eight flowers upon a stem. They force very easily, can be had in flower at Christmas, and continue in succession till June.

CULTIVATION.—Pot the bulbs in succession from the end of July, putting about six bulbs in a 5-inch pot. They thrive best in a mixture of good fibrous loam, leaf-mould, and decomposed manure in equal proportions, with the addition of a fair sprinkling of sand to ensure drainage.

Per doz.

Freesia refracta alba, pure white, very handsome, possessing a peculiar grace of form and delightful fragrance, one pot of five or six bulbs being sufficient to perfume a whole house. The unexpanded blooms will open in water. Strong roots. See illustration **per 100, 6/-** 1/-

Freesia Leichtlini major, a fine variety of large size, delicious fragrance, and robust branched habit; the flowers are of a rich primrose colour, with a small orange blotch on the lower petal **per 100, 6/6** 1/-

Freesia, Finest Mixed, Seedlings

GERMAN IRIS.

GERMAN IRIS.

In this group may be found the most diversified shades of blue, yellow, white, claret, and many very beautiful marbled and mottled varieties. The plants are of easy cultivation, and are admirably adapted for shrubbery borders, wild gardens, woodland walks, or for surrounding lakes, &c.

In the descriptions, S is used to signify the standards or the erect petals; F, falls or drooping petals.

IXIA PRESTIOS.

BELLADONNA AND GUERNSEY LILIES.

The bulbs of these beautiful Lilies arrive about the end of August, but the supply is often very limited and always uncertain. For bulbs in bud, orders should be given as early as possible (not later than the first week in September). In executing orders the buds are carefully examined, and only those we consider will flower freely are sent; but owing to their peculiar character we cannot hold ourselves responsible for failures that may occur. On receiving the bulbs they should at once be potted and liberally supplied with water.

(Dormant Bulbs)	4/-	crimson-scarlet, Dormant Bulbs	5/-

LILIUMS.

Lilies may be classed as the most beautiful and ornamental of all bulbous plants. The stately, graceful habit of growth, large and variously-coloured flowers, many of which are very fragrant, render them attractive subjects for greenhouse decoration and for outdoor culture. Many of the strong-growing sorts are well adapted for planting among shrubs or similar situations, as nearly all are hardy, but the bulbs should be protected from frost.

For retarded bulbs of Liliiums, see page 50.

Those marked (*) are the most desirable sorts for greenhouse decoration, and marked s are stem-rooting varieties.

Each. Per doz.

s * **Auratum** (The Golden-rayed Lily of Japan), a magnificent species with flowers from 6 to 8 in. in width. Among those offered are many varieties, some being almost white, whilst others are spotted, more or less, with crimson, and some have bands of gold or crimson running through the centre of each petal. This Lily does best where the plants are sheltered from cold winds and protected from the midday sun.

Imported bulbs

Extra large bulbs

s * **Auratum platyphyllum**, gigantic flowers of great substance, broad petals with yellow band slightly spotted

per doz., 5/-, 7/6, 10/- and	—	15/-
1/6 to	2/-	—
	2/-	21/-

s * **Auratum rubro-vittatum**, flowers pure white, spotted with crimson, a deep crimson band down the centre of each petal; a distinct and very attractive variety. Height 3 to 4 ft., **2/6** —

s * **Auratum Wittei** (Imperiale), magnificent pure white flowers, with clear golden bands **3/6** —

* **Batemani**, flowers in August, height 3 ft., six to eight flowers on a stem, clear bright apricot - coloured flowers **-/9 7/6**

s * **Brownii**, large trumpet-shaped flower, interior white, exterior tinged brown; a very beautiful Lily, flowering in June and July **2/-** —

Canadense flavum (The Canadian Lily), flowers yellow, spotted with black; succeeds best in a damp situation **1/3 12/-**

Canadense rubrum, reddish orange, spotted with black, height 2 to 2½ ft.; a distinct and beautiful Lily, flowering in July **1/3 12/-**

Candidum (The Madonna Lily; White Garden Lily), the flowers are pure white, bell-shaped, and are nearly erect on racemes. Perfectly hardy. Height 4 to 5 ft. **per 100, 22/6** — **3/-**

Candidum, extra strong for forcing **per 100, 28/-** **-/6 4/-**

Chalcedonicum or **Scarlet Turk's Cap**, a very beautiful variety, growing from 3 to 4 ft. high, and producing six to eight brilliant scarlet flowers **1/- 10/6**

Colchicum (*Savitskianum*), a very beautiful and delicately - scented Lily; flowers large and reflexed, of a beautiful pure citron-yellow colour, slightly spotted with black. Height 3 ft. See illustration, page 39 **1/- 10/6**

Extra large **1/6 15/-**

s **Croceum** (Orange Lily), orange - coloured flowers, spotted with black; a well-known hardy sort, flowering in July. Height 3 to 5 ft. **-/6 4/6**
Extra large **-/8 6/-**

LILIUM AURATUM.

LILIUM HARRISII.

* **Harrisii** (*Longiflorum floribundum* or the Bermuda Easter Lily), a splendid variety, differing from the type in being more floriferous and producing larger flowers of fine substance. The flowers are pure white, of most delicious fragrance, averaging 4 to 5 in. in length, and well opened at the mouth; excellent for forcing. See illustration

* " **extra strong bulbs**, fine for early forcing

Each. Per doz.

1/- 10/-
1/6 16/-

S **Henryi**, English grown. This splendid Lily is quite hardy, and may be described as an orange-yellow *L. speciosum*; it is very free-flowering, a vigorous grower, and when established it frequently attains a height of 6 ft.

3/6 5/-

S **Krameri** (Japan), a very beautiful species, flowers of a charming blush-pink colour; plant in sandy loam. Height 2 ft.

-/8 7/6

Lancifolium, see **Speciosum**.

S * **Leichtlini** (Japan), 3 to 4 ft. high, flowers golden yellow, spotted with purple. August flowering

1/6 15/-

S * **Longiflorum**, these flowers are large and trumpet-shaped, with spreading segments, pure white; fine for forcing or for the open ground; June and July flowering. Height 1½ to 2 ft.

per 100, 21/-

1/- 10/6

" **Giganteum, retarded Bulbs**, these can be supplied until the end of October. See page 49.

Martagon Dalmaticum, flowers of a glossy deep crimson-purple, a very distinct and beautiful form

2/3 25/-

" **purple**

{ Flowers pendulous, with much reflected segments, and borne in pyramidal racemes at the crown of the stem

-/5 4/-

" **white**

2/6 —

Pardalinum, bright orange, spotted with maroon, flowers drooping; hardy, will do well in any garden soil but thrives best in peat; recommended for shady spots. Height 4 to 6 ft.; flowering in July

-/6 4/6

Parryi, golden yellow flowers, spotted with light brown; of easy culture, generally producing from ten to fifteen blooms on a stem, flowers in July, sweet scented; plant in peat in a moist situation

2/6 —

Pyrenaicum (Yellow Turk's Cap), yellow, spotted black. Height 3 ft.; an early-flowering hardy sort of easy culture

-/6 4/6

S **Rubellum**, a beautiful species from Japan, with flowers of a delicate pink and sometimes deep rose, with light yellow anthers; a very charming variety, sweet scented

1/3 12/-

* **Sulphureum** (*Wallichianum superbum*), a splendid Lily, of easy cultivation, growing from 4 to 6 ft., with immense creamy yellow trumpet-shaped sweet-scented flowers, 9 in. long, and of great substance,

2/6 to 3/6 —

39

LILIUMS—continued.

Each. Per doz.

Davuricum, see **Umbellatum**.

Elegans (*Thunbergianum*), this class of Lily is most useful for masses or for early summer flowering in beds. They vary from 1 to 1½ ft. in height. The flowers, which are borne in umbels, are cup-shaped, varying in colour from pale yellow to rich orange-red and crimson. All flower in May and June.

Elegans atrosanguineum, rich deep crimson, shaded with orange-yellow; splendid form

-/9 7/6

" **fulgens**, large orange - crimson flowers; very showy

-/8 6/-

" **Orange Queen**, large bright orange flowers, with small black spots

1/6 —

" **robustum**, orange-yellow flowers, heavily spotted crimson-brown; a handsome vigorous-growing variety

-/9 8/-

Excelsum (*Testaceum*), a free-growing and beautiful hardy Lily. Flowers deep buff colour, much reflexed, very fragrant. Height 4 to 5 ft.

1/6 16/-

* **Giganteum**, a handsome Lily bearing in July and August flower spikes of from 6 to 8 ft. in height. The flowers are white, trumpet-shaped and drooping, and the inside is beautifully marked with violet - crimson. Hardy in sheltered positions

3/6, 5/-, 7/6 to 10/-

* **Hansonii**, distinct; flowers bright golden yellow, spotted crimson

1/6 —

LILIUM COLCHICUM. See page 38

LILIUMS—continued.

Each. Per doz.

- s Speciosum (lancifolium)*, these are amongst the most useful and beautiful of all the Lilies for conservatory decoration and also succeeds admirably in the open border, producing an abundance of flower. They comprise a variety of colour from pure white to deep crimson spots on a white ground, and flower in August and September. Height 3 ft.
- * *Speciosum album*, pure white flowers -/9 7/6
- * " *Kraetzeri*, magnificent large pure white flowers of fine form and great substance; the best white variety. Height 3 ft. 1/- 10/6
- " *magnificum*, a grand new Japanese variety, resembling *Melpomene* but richer in colour, larger in flower and of great substance often measuring 8 in. across the petals. The plant is very robust and the spike bears ten to twenty blooms. Award of Merit, Royal Horticultural Society, each, 1/- & 1/6; per doz., 10/6 & 15/-
- " *Melpomene*, flowers rich crimson, heavily spotted and edged white; a fine variety -/9 8/6
- * *roseum*, white, spotted and stained with rose -/8 6/-
- * *rubrum*, white, heavily spotted with red -/8 6/-
- Superbum*, a splendid variety, 4 to 6 ft. in height. The flowers are orange, beautifully spotted with black, and are borne in pyramidal racemes -/8 6/-
- * *Tenuifolium*, a dwarf species; flowers brilliant scarlet, of the same shape as the Turk's Cap. Height 12 to 18 in. -/9 8/6
- " *"Golden Gleam,"* a remarkable hybrid, the result of a cross between *Tenuifolium* and the Martagon section, golden yellow 2/6 —
- Thunbergianum*, see *Elegans*.

LILIUM SPECIOSUM RUBRUM.

LILIUM LONGIFLORUM.

- s Tigrinum*, all the varieties of *L. tigrinum* are perfectly hardy and of easy cultivation, of strong growth, 3 to 4 ft. in height, and produce large pyramidal heads of bright flowers deep orange-red, more or less spotted purplish black. Generally they bear from twelve to twenty blooms on a stem, and flowering in July and August, form an attractive feature when planted in clumps in borders, &c. [Each. Per doz.]
- Tigrinum splendens* (Tiger Lily), best form of the *Tigrinum* section, reddish orange, spotted black per 100, 12/6 -/3 1/9
- " *Fortunei*, orange-scarlet, spotted crimson -/4 3/-
- " *Fortunei giganteum*, very robust variety with spikes 5 to 6 ft. high and carrying forty to fifty flowers of splendid colour; bulbs arrive in December -/6 5/-
- Extra large* -/8 7/6
- s Umbellatum (Davuricum)*, very showy and perfectly hardy varieties, flowering in June and July. They vary in colour from deep orange to orange-crimson, and are more or less spotted with black, the flowers being produced in umbels of from eight to twelve flowers. Height 2 to 3 ft.
- Umbellatum Cloth of Gold*, golden yellow, almost without spots 1/- 10/-
- " *erectum*, red, flushed orange -/4 3/6
- " *grandiflorum*, light orange-red -/4 3/6
- " *Incomparable*, rich crimson -/4 3/6
- " *maculatum*, reddish orange -/4 3/6
- " *mixed varieties*, very showy, excellent for mixed borders, per 100, 17/6 -/3 2/6
- Washingtonianum*, an exceedingly fine variety; flowers white tinged with lilac; it requires a partially shaded position. Height 3 to 4 ft. 2/- —

Retarded Bulbs, see page 49.

LACHENALIA.

Easily cultivated bulbous plants, very valuable for greenhouse and conservatory decoration.

The bulbs should be planted in September 2 inches apart, in a compost of fibrous loam and leaf-mould, with an addition of a little decayed cow manure and sand.

Very effective for baskets. See illustration.

A lining of moss should be put in the bottom of the basket to prevent the soil from falling through, and the bulbs placed in such a way that they will grow through the moss in a downward as well as horizontal and erect directions. When they have well started into growth, water should be given plentifully.

	Each.	Per doz.
Cawston Gem , flowers yellow, with crimson margin, fine bold spike	-/8	7/6
Luteola , flowers yellow, with green and red markings	-/6	4/-
Nelsoni , the best of the yellow varieties, producing long spikes of large bright golden yellow flowers; very attractive	-/8	6/6
Pendula , rich crimson, flowers tipped with green	-/6	5/6
Tricolor , yellow, suffused red, and tipped with green	-/8	6/6

LEUCOJUM.

	Per doz.
Æstivum (Summer Snowflake), flowers in June	per 100, 4/- -/8
Pulchellum , white with green tips; flowers late in spring. See illustration	1/3
Vernum Carpathicum (Spring Snowflake), flowers white with green spots	per 100, 5/6 -/10

MUSCARI (Hyacinthus).

“GRAPE,” “FEATHER” and “STARCH” HYACINTHS.

A beautiful class of early-flowering bulbs, deserving extensive cultivation, as, like the Scillas, they are very hardy, will thrive in any soil, and are suited for borders shaded by trees. *Botryoides* and its varieties are charming little plants of dwarf growth, and continue a long time in bloom.

Per 100. Per doz.

Botryoides (Grape Hyacinth), bright blue
per 1,000, 15/- 1/9 -/4

Botryoides album, white; very pretty little plant,
per 1,000, 30/- 3/6 -/8

Comosum (Tassel Hyacinth), a very fine species, large bright blue flowers
6/6 1/-

Heavenly Blue, a charming variety of a rich bright blue shade, should be planted in large masses, when the effect is very beautiful from the end of March to May,
per 1,000, 42/6 4/6 -/8

Neglectum (Starch Hyacinth), large spikes of dark indigo-blue flowers; earlier and larger than *Racemosum*, distinct and fine
12/6 1/9

Plumosum (Feather Hyacinth), large plume-like heads of a mauve colour
4/- -/8

LACHENALIA NELSONI.

LEUCOJUM PULCHELLUM.

MUSCARI BOTRYOIDES.

MONTBRETIA, "Tritonia."

Most graceful showy plants of rich colour, with small Gladioli-like flowers on branched spikes about 2½ ft. high, blooming in August; they succeed well in warm situations out-of-doors, and are excellent for pot culture.

NEW VARIETIES.

	Per doz.
Prometheus , "the finest Montbretia yet raised, for not only has it large and brilliant flowers, but it grows with remarkable vigour, and flowers with a freedom that is sure to make it popular. The plants shown were 3 ft. 6 in. high, and the spikes were freely branched. Each flower measured 3¼ to 3½ in. across, and was of a rich orange colour, flushed and stained with crimson at the centre. Award of Merit, Royal Horticultural Society."— <i>Gardeners' Magazine</i>	each, 1/6 16/-
Westwick , very distinct orange-red, with clear yellow base, and a dark circle of maroon,	each, 1/9 18/-
Lady Hamilton , fine yellow flowers, like a <i>Watsonia</i> in shape, flower and habit; the centre of the flower is suffused with rosy orange when it first opens, changing gradually to apricot when fully expanded	each, -/6 5/-
Norvic , a most distinct and valuable new seedling, very compact and dwarf in habit (18 in.), and late in flowering, stems much branched; flowers are large, yellow stained externally with red	each, -/9 7/6
King Edmund , very handsome close spikes of rich golden yellow flowers, 3 in. across marked with six to eight chocolate spots at the throat. Height 3 ft.	each, 1/3 12/-
Pottsi grandiflora , bright red, centre golden yellow	per 100, 3/- -/6
Crocsmiaeflora , brilliant orange-scarlet	" 2/9 -/5

TRILLIUM GRANDIFLORUM.

SPIRÆAS. See pages 49 and 51.

STERNBERGIA LUTEA.

(*Amaryllis lutea*).

Bright golden yellow colour, flowering late in the autumn 1/-

TIGRIDIA.

Very showy and beautiful summer-flowering plants for the open border, having richly spotted flowers; bulbs ready in December.

	Per doz.
Canariense , bright yellow, spotted with scarlet	1/6
Conchiflora , yellow, spotted bright red	1/6
Grandiflora , rich scarlet, spotted orange; a tall variety	1/6
„ alba , large white flowers, copiously spotted with rich lake; a strikingly beautiful variety	1/6
„ Immaculata alba , pure white, very beautiful	1/6
Pavonia , red and orange, a very showy and well-known sort	1/6
Speciosa , dark scarlet and yellow; a strong grower	1/6
Mixed Hybrids , fine mixture of the above	1/3

TRILLIUM, “American Wood Lily.”

Valuable hardy plants for spring decoration or pot culture; for planting in masses in woods or borders they are very ornamental. They succeed best in moist shady situations.

Erectum, flowers dark purple, strongly scented

Grandiflorum, beautiful large pure white flowers, forces well, free flowering, and very ornamental in the border; flowers freely in May per doz., 5/6 -/6

TRITONIAS.

An exceedingly attractive class of bulbous plants suitable for pot culture. The flowers are of the most brilliant colours, varying from bright rose to rich orange-scarlet, and are very decorative for the greenhouse or conservatory.

	Per doz.		Per doz.
Brilliant , orange-scarlet	2/-	Prince Alfred , rosy white.	3/-
Crocata , orange	2/-	Squalida , white, tinged pink	2/-
Incomparable , large and bright	3/-	Finest Mixed per 100, 6/-	1/-
6 each of 8 beautiful varieties, 7/6.			

TROPÆOLUM.

Very graceful plants of rapid growth, elegant alike in flower and foliage, and highly decorative for trellis-work or hanging baskets.

	Each.
Polyphyllum , golden yellow, hardy, invaluable for rockwork	per doz., 6/- -/8
Speciosum , rich vermillion, hardy	„ 10/- 1/-
Tricolorum (<i>Jarrattii</i>), scarlet, yellow and black; free-flowering and attractive	-/6
Tuberosum , scarlet and yellow, hardy, but tubers should be lifted in the autumn,	per doz., 3/- -/4

TIGRIDIA PAVONIA.

TUBEROSE, THE PEARL.

DOUBLE TUBEROSES.

The flowers are pure white, perfectly double, delightfully fragrant, and invaluable for bouquets, button-holes, and wherever cut flowers are in demand. Planted in succession from the end of September till June, a continuous supply of bloom may be had all the year round. The bulbs should be potted firmly in rich loamy soil, plunged in bottom heat, the temperature not to fall below 60° F.; water should not be given until the foliage appears, then freely, and grow on in a house with uniform high temperature and a moist atmosphere.

		Per 100.	Per doz.
American, selected large roots	{ Bulbs ready for delivery end of December }	10 6	1 9
The Pearl, dwarf habit, selected large roots		12 6	2/-
African, earliest-flowering variety.	Bulbs ready in October	15/-	2 6

TRITELEIA, "Milla."

Very pretty spring-flowering plants of hardy constitution, well adapted for planting on rockwork or for edging.

TRITELEIA UNIFLORA.

		Per 100.	Per doz.
Laxa, umbels of light purple flowers, highly decorative		7 6	1/-
Uniflora (Spring Star Flower), white, shaded porcelain. See illustration	per 1,000, 15 6	1 9	-/3
„ violacea, violet-blue, very free flowering		1 6	-/3

WATSONIA.

Very beautiful flowers, requiring the same culture as Cape Gladioli.

	Per doz.
Angustifolia, 1 to 1½ ft. in height, delicate pink-coloured flowers	2 6

WATSONIA ARDERNEI.

Iridifolia Ardernei, large pure white flowers borne on elegant spikes 2 to 3 ft. high, specially recommended for pots in cool greenhouse and for cutting, the cut flowers will remain in good condition for three weeks; very free flowering. each, -/9 7 6

Mixed, flowers freely produced and containing many distinct shades 2 6

ZEPHYRANTHES.

Very ornamental early summer-flowering pot plants, requiring greenhouse treatment, with the exception of *Candida*, which is hardy and autumn flowering.

Atamasco, "Atamasco Lily," syn. *Amaryllis Atamasco*, pure white, fine for greenhouse each -/6

Candida, "Peruvian Swamp Lily," white, tree flowering, hardy, autumn flowering variety; fine for edging, masses, &c. per 100, 4 6; per doz. -/8

Carinata, beautiful delicate rose-coloured flowers; summer flowering per doz., 6 6; each -/8

MISCELLANEOUS BULBS AND PLANTS.

ACHIMENES, beautiful greenhouse plants, flowering in May and June.
24 in 6 distinct varieties. Dormant Corms 6/6
12 in 3 distinct varieties " " 3/6
Choice Mixed, comprising many beautiful and brilliant colours, per doz. 2/-

ACIDANTHERA BICOLOR, a valuable addition to bulbous flowering plants for the garden or greenhouse, requiring the same treatment as for the Gladioli. First Class Certificate, Royal Horticultural Society each 3/-

AMORPHOPHALLUS RIVIERI, "Umbrella Arum," a peculiar and handsome plant, with Palm-like foliage, stem marbled with white each 2/-

ANOMATHECA CRUENTA, scarlet, spotted crimson; very pretty, blooming in July and August. Height 9 in. Plant in early spring per 100, 5/-; per doz. -/9

ANTHOLYZA, showy plants, somewhat after the style of the Gladioli; should be protected from frost.
Coccinea, bright scarlet per doz. 2/-
Fine mixed varieties " 2/-

ANTHERICUM, hardy ornamental border plants, from 2 to 3 ft. high, flowering in June and July, thriving best in a rich light soil.

Graminifolium (*ramosum*), pretty grass-like foliage, flowers pure white each -/6

Liliago major (St. Bernard's Lily), pure white starry flowers, each -/9

Lilium (St. Bruno's Lily), a pretty plant with broad grassy leaves each -/6

Lilium (*Algeriense*), flowers pure white, larger than the type each -/9

APIOS TUBEROSA, hardy deciduous climber, with pink and brown flowers for covering trelliswork, &c., per doz. 2/-

ARUMS—

Cornutum, palm-like foliage with marble stems, flowers red spotted with black each, 6/- and 1/-

Dracunculus (Dragon Arum), a hardy variety, with very large handsome purple spathes and curiously marbled stems, each -/4

Sanctum, the black Calla, from Lebanon, spring flowering " -/6

BOBARTIA AURANTIACA, suitable for rock-work, &c., producing bright salmon-rose flowers in June and July. Height 12 in. per 100, 6/-; per doz. 1/-

BULBOCODIUM VERNUM, rosy purple, a pretty very early spring-flowering plant. Height 1½ ft., per 100, 20/-; per doz. 2/9

CALLA (Richardia)—

Elliotiana, a very rich and pure yellow flower, spotted leaves, a most valuable acquisition for the conservatory and greenhouse. First Class Certificate, Royal Horticultural Society. Seedlings, 2/6 each. Stronger bulbs, 3/6, 5/- and 7/6 each.

Pentlandi, a beautiful companion to the preceding. The leaves are wholly green, and there is a broad black band at the base of the spathe. 5/- each. Strong flowering bulbs, 7/6 and 10/6 each.

Albo-maculata, leaves spotted white, flowers white with purple throat per doz. 3/6

Æthiopica, pure white; the well-known Trumpet Lily " 6/-

Æthiopica, strong plants in pots per doz., 18/- to 30/-

Æthiopica, Little Gem, a pretty miniature form each 1/-

Hastata, beautiful yellow flower, with black centre, per doz. 5/-

CRINUM—

Capense (*longifolia*), rose per doz., 3/6; each -/4

Capense alba, white " 5/6 " -/6

Powellii, rosy white " 2/-

Powellii alba, very beautiful, large pure white flowers " 1/6

CROCOSMIA, plant in light soil in spring. Height 3 ft.

Aurea, bright orange-yellow per doz. 2/-

Aurea Imperialis, orange-red each 1/6

EUCARIS—

Amazonica, beautiful stove plants, pure white " 2/6

EUCOMIS PUNCTATA

fine autumn-flowering plant with large spikes of very fragrant greenish white starry flowers, surmounted by a tuft of spotted foliage.

Height 2 feet, per doz. 7/6

FUNKIA, "Hardy Plantain Lily," handsome ornamental foliage plants.

Fortunei, deep green foliage, flowers white, shaded lilac, each 1/-

Grandiflora, large pure white flowers " -/9

Lancifolia marginata, leaves edged with white " 1/-

Sieboldi (*cuscutella*), large blue-green foliage " -/9

Undulata variegata, very showy and variegated foliage " -/9

GLORIOSA

handsome free-flowering stove climbers—
Rothschildiana, glowing crimson with dark purple at the base each, 3/6 and 5/-

Superba, rich orange and yellow each 3/6

HELLEBORUS—

Niger, the ordinary Christmas Rose, flowers white, small; flowering plants for planting out, per doz., 7/6; each -/9

" **major**, pure white flowers, one of the best of this group, strong clumps, per doz., 18/- to 21/-; each 2/-

" **maximus**, very early, flowers large, slightly shaded with pale rose each, 1/6, 2/6 & 3/6

" **angustifolius**, distinct and fine variety, pure white, each, 1/6, 2/6 & 3/6

" **Madame Fourcade**, light green foliage and pure white flowers each 2/6

" **Riverstoni**, strong and robust-growing variety " 2/6

HELLEBORUS ORIENTALIS—

Lenten Roses, 6 in 6 named varieties 6/- & 9/-

Lenten Roses, 12 in 12 named varieties 9/- & 12/-

Seedling Varieties, good strong-flowering plants, very varied in colour each, -/9; per doz. 7/6

HEMEROCALLIS, Day Lily," fine hardy plants for herbaceous borders, very fragrant.

Each. Per doz.

Aurantiaca major, beautiful rich orange-yellow -/9 7/6

Disticha fl. pleno, rich bronzy yellow flower -/6 5/-

Flava, clear yellow, very sweet scented -/6 5/-

Fulva, dark orange-colour flowers -/6 5/-

Fulva fol. striata, dark orange flowers -/9 7/6

Kwanso fl. pleno, double bronze-coloured flowers -/6 5/-

Middendorffii, deep orange-yellow; useful for cutting -/9 7/6

Thunbergii, clear canary-yellow -/9 7/6

Six distinct varieties of *Hemerocallis*, 3/-.

HEPATICA, lovely dwarf spring flowers, very pretty when grown in masses and left undisturbed.

Each.	Each.
Angulosa , sky-blue -/9	Red , double -/6
Blue , double 2/-	Red , double, large clumps 1/6 & 2/6
Blue , single -/6	Red , single -/9
Blue , single, large clumps, 1/6 & 2/6	White , single -/9

IXIOLIRION—

Tartaricum, free-flowering purple bulbous plants, flowering in May and June. Height 1½ ft.

per 100, 10/6; per doz. 1/6

MISCELLANEOUS BULBS AND PLANTS—continued.

MILLA BIFLORA, a beautiful Mexican bulbous plant with tall flower stems carrying one, two, and sometimes three blossoms, starry in outline, wax-like in texture, and pure white. The bulbs should be grown under glass, or kept dry through the winter, and planted outdoors in March and April in a well drained and sunny situation,
per doz. 4/-

NERINE—

Coruscans, large heads of brilliant scarlet flowers each 3/6

Fothergilli major, improved form of *Fothergilli* „ 3/6

Sarniensis (Guernsey Lily), brilliant crimson-scarlet „ 1/-

OSTROWSKIA MAGNIFICA, one of the finest hardy perennial plants. It has gigantic campanulate flowers, measuring 5 to 6 in. across, of a delicate and mauve-lilac colour suffused with white, and with deeper veins and reticulations each, 1/6 to 2/6

POLYGONATUM MULTIFLORUM.
"Solomon's Seal."

PANCRATIUM FRAGRANS, stove plant with fragrant white flowers each 3/6

POLYGONATUM, highly decorative hardy spike-flowering plants for borders, with long graceful spikes of pendulous white.

Multiflorum (Solomon's Seal), fine for forcing per doz. 2/6

Macrophyllum, large and handsome variety, growing 2 to 3 ft. in height per doz. 10/6

SANGUINARIA CANADENSIS MAJOR, very pretty starry white Anemone-like flowers, produced freely early in spring per doz. 5/-

SCHIZOSTYLIS COCCINEA—

Strong Plants, in pots, for growing on for winter-flowering per doz. 5/-

Single Crowns, from the open ground, for outdoor planting per doz. 1/-

SISYRINCHIUM, narrow Iris-like foliage.

Grandiflorum, rich purple, a very pretty dwarf variety each -/9

SOLOMON'S SEAL, see *Polygonatum*.

TRITOMA (Kniphofia) Caulescens, buds of red colour, changing to greenish yellow as the flowers open each 2/6

Corallina, showy dwarf variety, brilliant scarlet „ 1/-

Hybrida, seedlings from choice named varieties, per doz., 10/6; „ -/9

Macowani, orange-red; pretty dwarf species „ 1/-

Nobilis, immense spikes of orange-red flowers „ 1/-

Uvaria grandiflora, strong spikes of red and yellow flowers per doz., 6/-; each -/8

Many other beautiful varieties, see *Herbaceous Plant Catalogue*.

VALLOTA PURPUREA (*Amaryllis purpurea*), "Scarboro' Lily," bearing in autumn and the winter months trusses of *Amaryllis*-like bright scarlet flowers each, 1/6 and 2/6

For other varieties, see *Indoor Plant Catalogue*.

LILY OF THE VALLEY.

RETARDED LILY OF THE VALLEY.

RETARDED CROWNS.

8/6 per 100.

Directions for Forcing.

Pot the crowns at once into 5-in. pots, twelve to fifteen crowns in a pot, keeping them well above the soil.

When potted, give a good soaking of water and place in a cool frame for three or four days. Then remove to a temperature of 55 to 65 degrees F.

It is important to shade the crowns from strong light until the spikes appear, and then give a gradually increasing amount of light.

They should flower in about twenty-one days from the time of potting.

Retarded crowns are not recommended after Christmas. In the early months of the year ordinary crowns are supplied. These require similar treatment, but rather more heat, and take longer to bloom.

Arrangements may be made for weekly supplies, and quantities may be ordered for despatch in small lots on stated dates.

Ordinary Crowns, per 100, 6/6; per 1,000, 60/-

FORTIN'S GIANT LILY OF THE VALLEY.

See illustration, page 49.

This fine large-flowering variety is superior to the old type, with individual spikes of from fifteen to twenty large handsome bells of great substance.

Retarded crowns take three or four days longer to flower than the Berlin retarded, and must not be put in greater heat than 55 to 60 degrees F.; always place in a dull light and give no bottom heat. The crowns are ready from the middle of September.

Flowering crowns may be potted in February, and brought on slowly under glass.

Out of doors this variety should be planted in a partially shaded position, placing the crowns 8 inches apart.

Retarded Crowns, per 100, 20/-

Flowering Crowns, per 100, 16/-

Planting Crowns, per 100, 10/-

STRONG CLUMPS OF LILY OF THE VALLEY.

12/- per dozen.

Recommended for forcing and general greenhouse decoration, also for planting in the open.

RETARDED PLANTS AND BULBS FOR FORCING.

FORTIN'S GIANT LILY OF THE VALLEY.

See page 48.

Ready from the beginning of June to the end of October.

Full instructions with each consignment.

RETARDED LILIUMS.

	Per doz.	Per 100.
<i>Lilium auratum</i>	12/-	90/-
" <i>longiflorum</i> (Japanese <i>Harrisii</i>), extra large	10/6	75/-
" " " " special	14/-	105/-
" " <i>giganteum</i> , 7 to 9 in. in circumference	9/-	68/-
" <i>speciosum album</i>	10/6	75/-
" " <i>rubrum</i>	10/6	75/-
" <i>tigrinum Fortunei</i>	8/-	60/-

Directions for Forcing Retarded Liliums.

Pot the bulbs directly the frost has left them, placing them two inches below the surface of the soil to enable the stem to root. Place in a cool frame or greenhouse until well rooted, and shade from sun.

Temperature in autumn and winter 55 to 65 degrees F.

Lilium auratum and *L. longiflorum* should flower in thirteen to fifteen weeks from the time of potting; *L. speciosum* in eighteen to twenty weeks. If potted after July they will take longer to flower.

RETARDED SPIRÆAS.

	Per doz.
<i>Spiræa astilboides floribunda</i> , a very desirable and useful addition to this popular class	10/6
" <i>japonica</i> , strongly recommended for early forcing	8/-
" " <i>compacta multiflora</i> , dwarf compact habit	8/-
" <i>Lord Salisbury</i> , long elegant snow-white plumes on stout stalks standing erect above the dark green foliage	12/-

Directions for Forcing Retarded Spiræas.

Pot firmly directly the frost has left the roots. Place in a cool frame or greenhouse until the flower spike shows above the foliage. Then remove to a temperature of 60 degrees F., keeping the foliage dry at night.

They should flower in six to eight weeks. If potted after July they will take longer to flower.

Arrangements may be made for weekly supplies, and quantities may be ordered and despatched in small lots on stated dates.

VEITCH'S MUSHROOM SPAWN.

The numerous expressions of approval received from our customers enable us to attest with confidence that Veitch's Mushroom Spawn maintains the deservedly high reputation of former years. The bricks are evenly and thoroughly run with spawn. They are specially manufactured and delivered to us at short intervals, so that our customers may always rely on receiving fresh spawn.

Pamphlet on Mushroom Culture Free on Application.

"The Mushroom Spawn you supplied has yielded remarkable crops this season.—Mr. W. STRUGGELL, Gardener to the Hon. W. H. LONG, M.P."

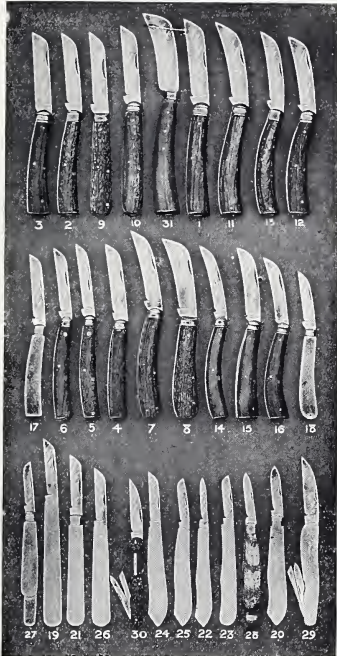

"From a bed made up last December with 1½ bushels Spawn, I have cut 200 lbs. of first quality Mushrooms and even now I get 3 to 4 lbs. per week. I had cuts of 8 lbs. at a time three times a week when the bed was fresh.—H. V. WOODGATES, Esq., Pond Farm, Worcester Park."

"The Mushroom Spawn you supplied in June has turned out excellent.—Mr. E. G. GOLDING, Gardener to F. A. KONG, Esq."

Veitch's Mushroom Spawn, fresh, very best quality,
per bushel, 5/-
